GÖKÇE GÜLER

Software Engineer | Backend Systems & Full-Stack Development
gokcenizguler@gmail.com | +90 542 588 9804 | LinkedIn | GitHub | Istanbul, Türkiye

PROFESSIONAL SUMMARY

- Software engineer building **multi-tenant SaaS platforms**, mobile applications, AI-assisted document services, and reusable backend packages for automotive, insurance, legal, and CRM products.
- Production experience with **Python, Django REST Framework, and PostgreSQL**, alongside React, React Native, Go, Docker, CI/CD, application security, technical coordination, and mobile releases.

WORK EXPERIENCE

EVERION CONSULTING

Software Engineer | Istanbul, Türkiye | March 2025 – Present

- Developed and shipped backend, web, and mobile capabilities across **8+ SaaS products** spanning automotive, insurance, legal, CRM, and AI-assisted document processing.
- Built REST APIs and asynchronous services using Django REST Framework, PostgreSQL, Redis, and Celery; implemented QRakter's **offline-first accident reporting** with Expo SQLite, NetInfo, and queue-based synchronization.
- Coordinated sprint priorities, task ownership, capacity, and code reviews across a **12-person development team**; served as a technical point of contact for company leadership.
- Supported Docker-based services, server administration, and application security across **approximately 15 virtual machines**.
- Managed Google Play publishing and releases for **four Android applications**, led **iyzico payment onboarding**, and established the company's Apple Developer and App Store Connect account.

EKŞIOĞLU HUKUK

Software Engineer | Istanbul, Türkiye | December 2024 – March 2025

- Developed backend and frontend capabilities for internal legal systems covering case management, insurance and arbitration filings, collections, and field operations.
- Built operational dashboards, reporting interfaces, and Excel/PDF exports using Django and React, replacing manual workflows with trackable digital processes.

SKYLAND A.Ş.

Business Analyst Intern | Istanbul, Türkiye | September 2023 – February 2024

- Prepared business analyses, user scenarios, process flows, and project documentation for software initiatives.

ZIRAAT TEKNOLOJI

Software Engineering Intern | Istanbul, Türkiye | July 2023 – September 2023

- Developed enterprise card-system features using C#, ASP.NET, Entity Framework, and MSSQL.

EDUCATION

BAHÇEŞEHİR UNIVERSITY

B.Sc. in Software Engineering, 100% English-Taught | Istanbul, Türkiye | 2024

- 100% Scholarship; completed the English Preparatory Program and earned the university's institutional English Proficiency Certificate.

CERTIFICATIONS

- Salesforce Certified Administrator
- Salesforce Certified Agentforce Specialist
- IBM Data Analyst Professional Certificate
- Miuul Data Scientist Path

SELECTED PROFESSIONAL PROJECTS — EVERION CONSULTING

Galerion — Multi-tenant dealership operations platform

Technologies: Django REST Framework, PostgreSQL/PostGIS, Redis, Celery, React, React Native, Docker

- Developed a **multi-tenant dealership platform with 108 registered dealerships**, covering inventory, CRM, documents, expenses, reporting, and inter-dealer operations across web and mobile applications.
- Implemented dealer-network sharing, pricing controls, vehicle valuation, and geospatial data workflows; owned major React Native flows for connections, messaging, proposals, and dashboards.

Doc AI — AI-assisted document-processing service

Technologies: Django REST Framework, Celery, Redis, PostgreSQL, Google Gemini API

- Architected a service that classifies multi-file and multi-page automotive documents across **22 document categories**, returning structured JSON in **about 6 seconds on average**, depending on file size.
- Integrated Doc AI across company products and cut HasarLink form completion from **7–8 minutes to about 50 seconds** through document-based auto-fill and user verification.

Notification Kit — Company-developed reusable Django notification package

Technologies: Python, Django, Celery, Firebase, PyPI

- Architected and **published Notification Kit v1.2.0 on PyPI**, standardizing email, SMS-provider, and Firebase push-notification workflows across **four production projects**.
- Designed extensible service, provider, model, API, and Celery task layers supporting individual, bulk, scheduled, retry, and cleanup workflows.

ADDITIONAL PERSONAL PROJECTS

Payment Orchestration and Reconciliation Platform — Merchant-isolated .NET payment platform

Technologies: .NET 10, ASP.NET Core, C#, Entity Framework Core, PostgreSQL, Docker, OpenTelemetry

- Developed a modular platform for authorization, capture, partial and full refunds, provider routing, settlement reconciliation, and **immutable double-entry ledger workflows**.
- Implemented **idempotent and concurrency-safe processing** with outbox and inbox patterns, signed webhooks, retries, policy-based authorization, OpenTelemetry, and PostgreSQL-backed integration tests.

MaritimeOS — Maritime consultancy operations platform | **GitHub ↗**

Technologies: Django REST Framework, PostgreSQL, Next.js, TypeScript

- Built a multi-tenant maritime operations platform using service-layer boundaries, event-driven communication, state machines, dependency-aware workflows, PostgreSQL-backed tests, and CI.

Gokceguler.com — Personal portfolio and content-management platform | **Website ↗** | **GitHub ↗**

Technologies: Go, Next.js, TypeScript, SQLite, Docker, LLM Integration

- Built a bilingual personal portfolio backed by a **Go REST API** and Next.js admin interface, with secure sessions, validated media uploads, automated tests, Docker, and CI.
- Developed an LLM-assisted CV import workflow that presents proposed portfolio updates as an **editable diff tree** and applies only administrator-approved changes.

SKILLS

- Backend: Python, Django, Django REST Framework, Go, C#, ASP.NET Core, Entity Framework Core, Celery
- Frontend & Mobile: React, React Native, Next.js, JavaScript, TypeScript, Expo
- Data & Architecture: PostgreSQL, PostGIS, Redis, MSSQL, SQLite, Multi-Tenancy, RBAC, Event-Driven Workflows
- DevOps, Cloud & Integrations: Docker, GitHub Actions, CI/CD, Nginx, Linux, DigitalOcean, AWS S3, Firebase, Google Gemini API, iyzico, PyPI
- Engineering & Languages: Automated Testing, Code Review, Technical Coordination, Requirement Analysis; Turkish (Native), English (Professional working proficiency)
